SUMMARY

Motivated Computer Science student with a strong interest in web development, focusing on frontend technologies like HTML, CSS, and JavaScript. Experienced in creating responsive and user-friendly interfaces that enhance the overall user experience. Familiar with PHP and Laravel, and continuing to build and expand knowledge in backend development. Eager to grow as a frontend developer and take on new challenges in the tech field.

EDUCATION**Pasonanca National High School**

With Honor (S.Y. 2015-2020)

Universidad De Zamboanga

Science, Technology, Engineering and Mathematics

With Honor (S.Y. 2020-2022)

Western Mindanao State University

Bachelor of Science Computer Science, Expected in 2026

PROFESSIONAL EXPERIENCE**Frontend Developer in Software Engineering**

- Designed and built the frontend of a web application using HTML, CSS, and JavaScript.
- Used Laravel to integrate backend functionality like routes, form submissions, and Blade templates.
- Collaborated with a team to complete features such as login, registration, and item listings.
- Focused on improving usability and mobile responsiveness of the interface.

SKILLS

- I can build responsive websites using HTML5, CSS3, and JavaScript.
- I have experience using Bootstrap and Tailwind CSS for faster frontend development.
- I understand basic UI/UX principles and focus on creating user-friendly interfaces.
- I have basic knowledge of PHP and Laravel, including Blade templating and routing.
- I use Git and GitHub for version control and collaboration with others.
- I can manage local development environments using XAMPP.
- I enjoy solving problems and paying attention to small details in my projects.
